OBJECTIVE

Entry-level Software Developer position utilizing software development knowledge and skills obtained in internships and Software Engineering coursework.

EDUCATION

The Ohio State University, Columbus, Ohio

Overall GPA (4.00 scale): 3.288

B.S. Computer Science and Engineering, May 2025

Honors: Roger, Carol, Eric, and Matthew Ober Scholarship, 2023 – 2025

Newark Endowed Scholarship, 2020-2022

Dean's Award 2021

Dean's List (>3.5 GPA) 4 semesters

QUALIFICATIONS

- Knowledge of object-oriented high-level programming languages.
- Experienced in test-driven development, agile frameworks, and software development.
- Proficient in data structures, discrete structures, algorithms, software design, and internet protocols.
- Relevant Coursework: Web Applications, Java Programming, Software Development, Low-Level Programming.
- Software: Python, Git/GitHub, SQL, C#.Net, Ruby, JavaScript/jQuery, Node.js, Linux, HTML, CSS, Java, Rails, C.
- Current Coursework: Enterprise Software, Database Systems and SQL, Artificial Intelligence I, Mobile Application Development, Software Requirements Analysis

ENGINEERING INTERNSHIP EXPERIENCE

Resilience Inc, Tampa, FL

WordPress Developer, August 2024 - present

- Helping to formulate an effective, responsive design built around Search Engine Optimization.
- Establishing and designing the website's architecture to ensure high-performance and availability.
- Responsible for both back-end and front-end development, including creating WordPress themes and plugins.

The Ohio State University, Columbus, OH

Student Research Assistant, August 2024 – present

- Applied fundamental web design philosophy to develop a mobile-first website for Dr. Ju-Yeon Park.
- Assisting in creating a web scraper to accumulate the data of the 119th congress's legislators and committees utilizing Selenium with Python.
- Utilized ChatGPT API to designate major topic categories of 3500 congressional hearings.
- Assisted in utilizing Python libraries to implement OCR to collect data from congressional hearings in pdf format.

ACADEMIC SOFTWARE DEVELOPMENT PROJECTS

Ruby on Rails Database Project, July 2024

- Designed website using Rails framework to provide full-stack development using RESTful API.
- Utilized HTML, CSS/SCSS, JavaScript/jQuery, and Bootstrap to design the front-end of the website.
- Utilized Rails to designate routing and hosting a database for users to store data for the back end of the website

Personal C#.Net and Python Project, February 2024-present

- Designed and implemented a randomly generated TV block (Toonami) with basic media player controls.
- Mobile-first and dynamic design to allow user input, as well as the ability to scale to any display size.
- Developed a script to collect the file structure of the media library for the application to designate which file to play.

ACTIVITIES AND INTERESTS

- **Active C# and Python Project**, February 2024 – present
 - Personal programming project utilizing Unity studios and C#.Net framework to develop a personal media player.
- **Ohio State University Band**, August 2022 – present
- **Engineering Learning Community**, August 2020 - 2022
 - Selective program for incoming pre-engineering students with high mathematical aptitudes.
 - Nominated by instructors and teachers to mentor and instruct after my freshman year.
